

Industrial Rubber Granule

Description

Ambient ground black rubber, cut and classified to within each specific size parameter, reclaimed from new, post-industrial scrap rubber, *NOT* from discarded tires. Our Industrial granule has a greater longevity in UV conditions due to its superior quality of polymer content.

Applications

Used in playgrounds, Shock pads / E-layers, infill for turf, and synthetic running track applications.

Features

- Free of metal, stone, fiber and other contaminants
- Less than 2% dust content
- Sieve analysis standards available upon request

Typical Physical Properties

| <u>Test</u> | <u>Result</u> |
|---------------------|---------------|
| Specific Gravity | 1.10 – 1.25 |
| Hardness (Shore A): | 60 – 90 |
| Tensile Strength: | 3000 psi |
| Rubber Hydrocarbon: | 35% minimum |

**Results may vary slightly, relative to the average scrap rubber raw material used.

Storage and Handling

Keep material dry at all times and out of direct UV contact while in the plastic packaging. *Read the Industrial Rubber Granule, Material Safety Data Sheet before handling, or using this product.*

Packaging Form

Available in 2000 pound Tote Sacks or palletized in 55 pound (3 mil “Clear” plastic bags)

The information herein is to assist customers in determining whether our products are suitable for their applications. Our products are intended for sale to industrial and commercial customers. We request that customers inspect and test our products before use and satisfy themselves as to contents and suitability. We warrant that our products will meet our written specifications. Nothing herein shall constitute and other warranty express or implied, including any warranty of merchantability or fitness, nor is protection from any law or patent to be inferred. All patent rights are reserved. The exclusive remedy for all proven claims is replacement of our materials and in no event shall we be liable for special, incidental or consequential damages.
